Segway Tours Transportation of the future?

'Green' transport

This is not only another way to see Copenhagen; it is also a 'green' way of transporting yourself around. On the Segway, you experience on your own body the technologies and principles behind the gyroscope stabilizer and mechanical steering system. Lean forward and your vehicle moves forward. Lean backwards and your vehicle moves backwards or stops altogether.

The main sights which will be seen on a normal tour is: Copenhagen City Hall, Tivoli Gardens, The House of Parliament Christiansborg Castle, Nyhavn, The Royal Residence Amalienborg Castle, The Little Mermaid, the waterfront, The Rosenborg Castle, and many more interesting points.
No inside visits included.

The Segway Tours are between 1-2 hours, and they take you through the city center of Copenhagen. Depending of the length of the Segway hire, special routes and tours can be arranged.

Departure point can be arranged from almost anywhere in Copenhagen.

General Conditions

Group size: to 8 persons + Segway guide.
Operating dates: e.g. all year round
During winter it is weather depended
Assistance: English
Location: Copenhagen
